

BIAS PROJECT REPORTS

The BIAS journey unveiled – Get to know our public reports and deliverables produced by the consortium partners

The intermediate report of the mapping, survey and expert interviews

This report details how the BIAS Consortium conducted thorough desk and empirical research, consulting with a diverse range of stakeholders. Central to this effort is the goal of consolidating knowledge on AI applications and fairness in the labour market, laying the foundation for designing the Debiaser and other project initiatives, such as implementing the ALTAI (Assessment List for Trustworthy Artificial Intelligence).

Authors: Carlotta Rigotti, Eduard Fosch-Villaronga (Leiden University)

Final report on co-creation methodologies and findings

Authors: Marzia Cescon, Simona Lo Giudice, Maria Sangiuliano (Smart Venice)

read it here

This report outlines the methodology for organizing BIAS co-creation workshops in seven countries and an international workshop in Italy. It describes how stakeholders contributed to designing the Debiaser and Case-Based Reasoning systems. The report analyses results from the workshops, including engagement from HR officers, workers, advocates, legal experts, philosophers, and international stakeholders.

Dissemination, Exploitation, Communications Plan

This report details the dissemination, communication, and exploitation strategy for the BIAS project. It outlines plans to manage activities, develop communication channels, and collaborate on networking and sustainability strategies.

Authors: Joana Martinheira (LOBA), Marco Lopes (CrowdHelix), Soumya Datta (DigiTouch)
